1.0 Building & Safety Engineer - This position would provide the engineering expertise, review of difficult and complex plans and assist in the continuing training of the plan review staff. In addition, this position is responsible for programs for fabricators, retrofitting of un-reinforced masonry structures, approval of special inspectors and evaluating alternate methods and materials of construction. On January 15, 2002 the Board of Supervisors approved an increase to the salary range for the Building & Safety Engineer position in an attempt to draw more candidates, but it has proven to still be difficult to recruit.

0.2 Extra Help Building Inspector II - is used for peak workloads and vacation periods to provide coverage for services that would otherwise require the use of outside vendors at increased rates.

Both of these positions are fully funded by permit fees.
